

# PREMIUM ROOF PAINT RANGE

Made with premium acrylic polymer resin and top quality oxide pigments the Aurora Roof Paint Range provides long lasting durability, superior colour retention and excellent resistance to ultraviolet radiation so you can have confidence the job will last.

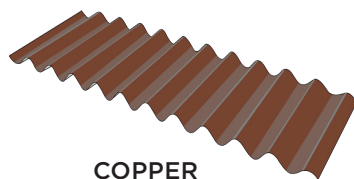

Aurora Roof Paints offer superior adhesion, low VOC, flexibility and resistance to mould. They are also suitable for drinking water collection. Can be matched to the Aurora Timber Estate Range and complemented by a matching range of stains.

Our standard range of colours are shown below, but if you are after something different let us know and we can colour match. Please take note that the colours displayed here are representative only and should be used as a guide only for your colour selection. We recommend you ask for a sample to try at home to confirm.

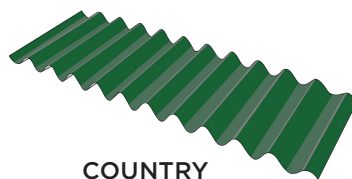

Coverage will depend on the surface being painted but in general allow for 12-14sqm per litre and we recommend two coats.
